

FORENSIC MEDIA ANALYSIS REPORT

CASE FILE: CASE-TEST-M7 — DIGITAL EVIDENCE EXAMINATION

1. CASE INFORMATION

Case Number:	CASE-TEST-M7	Case Status:	CASE_UNDER_INVESTIGATION
Case Title:	Milestone 7 Frontend Integration Test	Evidence Count:	1
Case Owner:	Test User	Assigned Investigator:	Test User
Incident Date:	N/A	Scan Date:	2026-09-24 16:15 UTC
Created Date:	2026-09-24 21:45 UTC	Scan Duration:	0.25 seconds

2. EVIDENCE EXAMINATION & MOCK AI ANALYSIS

EVIDENCE ITEM 01: evidence_m7_test.jpg

Evidence ID:	14	MIME Type:	image/jpeg
File Type:	IMAGE	File Size:	N/A
SHA-256 Hash:	57244f424f284ffbb6aae62425f06ea500000000000000000000000000000000		

Parameter	Analysis Result	Confidence
Deepfake Probability	75.0%	75.0%
Forensic Assessment	LIKELY MANIPULATED	High Confidence
Artifacts Summary	N/A	Simulated Scan

3. FINAL FORENSIC CONCLUSION

Based on simulated deepfake artifact detection algorithms, 1 evidence items were examined. The automated system evaluated frame consistency, noise distribution, and spectral frequency anomalies. Detailed parameter scores are logged in the Sentinel AI audit registry.

DEMONSTRATION REPORT — NOT AN ACTUAL FORENSIC DETERMINATION

This report was generated using simulated demonstration scanner metrics. No production AI deepfake model has been executed. This document serves as an architectural prototype for the Sentinel AI Portal.
